Improve My General English - Beginner is a general English course for beginner to elementary level learners that helps improve language skills and boost confidence.

*Students who have completed **Improve My General English – Beginner** should progress to **Improve My General English**, please contact us for further details.*

The course includes a wide range of practical, everyday topics like introducing yourself, numbers, shopping, and transport. Those who are willing to study 2-3 hours a week over several months will see a significant improvement in their level and in international exam test scores.

Students are exposed to a wide range of accents from around the English-speaking world to help prepare them for travel, or to help them progress to a pre-intermediate level of English and further study.

Improve My General English - Beginner offers varied content and task types and follows a clear and proven learning cycle to build skills systematically. The lessons are organized in a cyclical syllabus that allows learners to build their confidence with carefully graded reading and listening texts, moving from easy to more difficult.

Improve My General English - Beginner offers:

- Content rich-lessons at A1 level covering a range of topics presenting language in day-to-day situations.
- A suggested learning path that helps beginner-level students focus on a specific topic and practice grammar, speaking, listening and reading.
- A wide range of exercise types, with illustrations and photographs, to provide interest and aid comprehension.
- Material that includes a variety of accents from both English and non-English speaking countries.
- Detailed feedback on each activity plus a full grammar reference to support learning and review.
- End-of-lesson tests to measure progress.

Optional: Students who would like additional focus on their speaking skills can choose to include Pronunciation Practice with the Improve My General English package. Pronunciation Practice features short lessons that allow users to practise new words with a record and playback function and utilises speech recognition technology to identify problem areas.
